Amjad Lal K

DATA ANALYST

amjadlalkodithodika@gmail.com | 9207160927 | LinkedIn | GitHub

SUMMARY

Data Analyst skilled in Python (NumPy, Pandas), MySQL, and data visualization tools (Matplotlib, Seaborn, Power BI, Tableau). Experienced in data cleaning, manipulation, and exploratory analysis, with a track record of turning raw datasets into actionable insights. Passionate about problem solving and data storytelling, with hands-on expertise in dashboard design, business intelligence, and interactive reporting gained through a 7-month Data + Business Analyst program at Techolas Technologies, Calicut.

PROFESSIONAL EXPERIENCE

Data Analyst Intern January 2025 – October 2025

Techolas Technologies PVT LTD, Calicut

- Automated data pipelines using Python and SQL.
- Collected, Cleaned, and transformed large datasets using pandas and SQL to ensure data accuracy and reliability.
- Applied machine learning algorithms (e.g., Linear Regression, Logistic Regression) to build predictive models for business use cases.

SKILLS

- **Data Visualization Tools**: Power BI, Tableau, Microsoft Excel, Matplotlib, Seaborn
- **Programming**: Python, R
- **Databases**: MySQL
- **Data Manipulation & Analysis**: SQL, NumPy, pandas
- **Machine Learning**: Supervised Learning, Unsupervised Learning
- **Web Scraping & Development Environments**: Jupyter Notebook, Google Colab, PyCharm, R Studio
- **Soft Skills**: Analytical Mindset, Collaboration, Problem-Solving, Effective Communication, Adaptability, Leadership

EDUCATION

- **University of Delhi**

  Bachelor of commerce (BCom) 2024

PROJECTS

Blood Bank Donor Dashboard — Streamlit + My SQL Project January-2026

- Built a donor management dashboard with Streamlit, MySQL, Pandas, Plotly.
- Designed donor registration form with validation and secure DB connections (local + Railway).
- Added filtering, CSV export, and interactive charts (bar, pie, histogram, scatter).
- Implemented age distribution analysis and a personal "My Details" tab for profile showcase.

KFC Fried Chicken Preference Prediction App — Machine Learning Project September -2025

- Built an end-to-end ML web app to predict customer fried chicken preferences using synthetic, AI-generated data.
- Tools: Python, pandas, scikit-learn, imbalanced-learn, Streamlit, joblib, QRCode, PIL.
- Technical: Designed synthetic datasets with imbalance/outliers, applied SMOTE, implemented preprocessing (encoding, scaling), and trained Gradient Boosting/XGBoost models achieving ~99% accuracy.

ITC FMCG Biscuits & Candies — Excel Dashboard October-2025

- Excel expertise: Designed KPI cards, PivotTables, and slicers to deliver dynamic FMCG performance insights.
- Data generation: Built a synthetic dataset simulating realistic sales trends and product categories
- for analysis.
- Visualization & storytelling: Applied branded layouts and narrative visuals to present client-ready insights.

CERTIFICATIONS & EXTRAS

CERTIFICATIONS

- Data Analyst & Business Analyst Course – Techolas Technologies, Calicut
- MySQL Basic – Great Learning Academy
- MS Excel – Great Learning Academy
